Konfigurasi Timestamp Server (TSA) - Timestamp Server (TSA) Configuration

Timestamp Server (TSA) configuration needs to be done in the Adobe Reader application with the following objectives:

Konfigurasi Timestamp Server (TSA) perlu dilakukan pada aplikasi Adobe Reader dengan tujuan sebagai berikut:

1	Indonesia Ministry of Communication and Information Technology (Kominfo) requires that CAs in the signing process must use the TSA that is provided by the CA itself
	Kementerian Komunikasi dan Informatika (Kominfo) mengharuskan bahwa VIDA sebagai Penyelenggara Sertifikat Elektronik (PSrE) dalam proses penandatanganan secara elektronik harus menggunakan Time Stamp Server TSA yang disediakan oleh PSrE itu sendiri
2	Although the signing process occurs offline on the Adobe Reader application and outside VIDA's control, VIDA must inform the user to use TSA VIDA
	Walaupun proses signing yang terjadi secara offline pada aplikasi Adobe Reader dan diluar kontrol VIDA, namun VIDA harus menginformasikan ke user untuk menggunakan TSA VIDA
3	When the TSA VIDA is used at the signing process, the Timestamp that is in the digital signature cannot be modified (higher data integrity)
	Ketika TSA VIDA digunakan pada proses tanda tangan elektronik, maka Timestamp yang ada di tanda tangan elektronik tidak bisa dimodifikasi (data integrity nya lebih tinggi)

TSA Configuration Steps - Langkah konfigurasi TSA
